

Construction of photovoltaic plants in Slovakia: current situation and perspectives of development

A free conference/course of the **Italian-Slovak Chamber of Commerce** in collaboration with **VUB Banka** inside the project **PVS in BLOOM**

(www.pvsinbloom.eu)

23rd and 24th November 2010, VUB Banka, Mlynské nivy 1, 829 90 Bratislava 25

Concept

The PV conference/course “Construction of PV plants in Slovakia: actual situation and perspectives” provides practical insights into legal-administrative framework conditions regarding the deployment of PV in Slovakia. National experts from national PV associations and the PV industry, national Authorities and other specialists will speak about market perspectives and barriers to the development of PV in Slovakia. Specific recommendations on how to overcome such barriers will be discussed with the audience. With a view to current and future challenges to the deployment of PV the conference will put a focus on the practical experiences of the PV sector and the invited experts. The conference organized by the Italian-Slovak Chamber of Commerce in collaboration with VUB Banka inside the project PVS in BLOOM offers an ideal platform for acquiring knowledge and exchanging information and networking with high level decision makers and experts from the PV sector. High quality presentations, discussions and face-to-face contacts will allow PV project developers, sales managers, export

and marketing specialists, public affairs and public relations professionals as well as decision makers to be best informed about present and future legal-administrative framework conditions and barriers for PV system installations.

Objectives of the conference:

The conference will:

- Provide participants with detailed information on legal-administrative barriers during planning and installation processes of PV systems in Slovakia;
- Offer tailor-made suggestions and recommendations to remove administrative barriers;
- Provide the opportunity to discuss perspectives of the sector in Slovakia;
- Improve contacts between industry, grid operators, decision makers and authorities.

Participants

The conference is addressed to the following target groups:

- Industry representatives from the PV industry and the energy sector;

- PV project developers, system integrators and distributors;
- Utilities and grid operators;
- Service providers such as consultants, bankers, insurers etc.;
- Decision makers and authorities at national and regional level;
- Investors.

Language

Slovak and English.

How to participate

To register send by 15.11.2010 via FAX at +421 2 59103701 the following information (see attached form): Name, Surname, Company, Telephone Number, E-mail, Stamp and Signature of the participant, date in which the participant will be present (only 23rd Nov., only 24th. Nov. or both dates). Seats are limited and reservations will be based on first come first serve basis.

Construction of photovoltaic plants in Slovakia: current situation and perspectives of development

Seminar will take place on **23 and 24 of November** 2010 in the premises of **VUB Banka headquarters in Bratislava**.
Participation on the seminar is free of charge.

Program

23/11/2010

8,00 – 9,00	Registration and welcome coffee
